

I have been an over the road truck driver for nine years. I got my xm a year ago and it has made the road so much easier. I can listen to whatever I want to anytime of day and not have to worry about running out of the station's signal. The traffic and weather features a wonderful I can get real time traffic and weather where I'm going. When my children are out of school they enjoy the kids' channels. During those times I just give them the remote and let them listen to any children's station that they want to. This is a great benefit because even with radio there are only a few stations that I would let my children listen to. We love the children stations on xm. These radios are and excellent tool for anyone traveling. I would tell anyone to get it. I cant believe they want to limit wjat we can hear.
